

Available in three colours: blue, black and grey/silver.

Five filter levels available to match your needs.

Asthma Sport Race 1 Race 2 Race 3

The AirTrim mask is intended for anyone in a cold or dry environment. It can be used by all ages. AirTrim saves some of the heat and moisture from your own breath to warm and moisten the air inhaled. This will make it easier to breathe in cold/dry conditions and also help maintain core body temperature.

Made in Sweden by Vapro

Imported to Canada by Skigo Canada

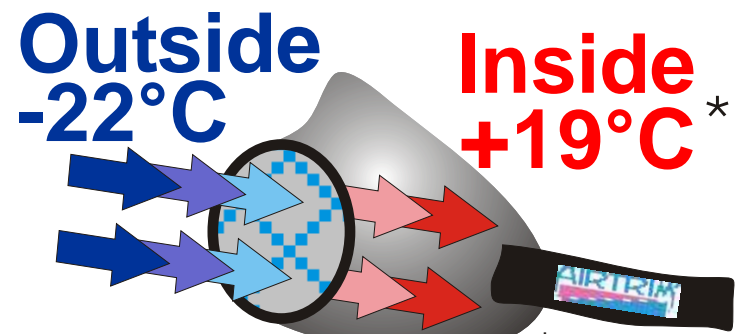

Heat & Moisture Exchange Mask

Make **cold air** **warm air**

Breathe easier in cold weather when walking, running, skiing and cycling

*with Sport filter

The AirTrim mask is easy to fit. It is held in place with an adjustable, high quality elastic strap.

The mask is easily lowered and refit if you need to drink or eat while using the mask. Full removal not required.

The mask fits all adults and most pre-teen children.

You can breathe with your mouth and/or nose. Your normal method of breathing remains the same at low and high activity levels.

Helps maintain your core body temperature in cold weather.

Can be used with any outdoor activity.
AirTrim has been used from +5C to -55C at all altitudes (sea to mountain).

Can improve sport performance in cold conditions.

AirTrim masks are easy to maintain: let the mask and filter air dry at room temperature; masks may be cleaned with a damp cloth.

Five different filters available to match your activity level and heat/moisture exchange requirements.

More effective and easier breathing than scarves and wraps.

Enjoy the Outdoors Once Again!

**Invented and Made in Sweden
Sweden knows cold just like Canada**

Testing of the AirTrim mask shows how effective it is at warming cold air before you inhale it.

Asthma Filter in mask

Ambient	-22°C	-10°C
Standing	+25°C	+31°C
Walking	+22°C	+27°C
Running	+21°C	+22°C

Sports Filter in mask

Ambient	-22°C	-10°C
Standing	+19°C	+26°C
Walking	+9°C	+24°C
Running	+10°C	+19°C

The tests were carried out by the Ergonomics and Psychology Section of the National Institute for Working Life at Solna, Sweden.

The AirTrim mask can be used by people doing many different cold weather activities including:

- walking and standing
- cross-country skiing (fitness and racing)
